6	Function Test	☒	☐	☐	☐	
7	Program Specific Requirements (Including Audit Report, Testing Report, Factory Information, Special Requirement for Submitted Sample, etc.)	☐	☐	☐	☒	

OVERALL RESULT

PENDING

1. This document reflects PMNUO-INSPECTION's findings at the time and place of inspection, which was conducted by means of comparing reference product(s) and documents against samples that are randomly picked in accordance with an agreed random statistical sampling standard from the lot(s) of finished products presented to PMNUO-INSPECTION's inspectors.

2. This comparison was done in accordance with agreed inspection protocols and/or other agreements. If certain methods and processes which vary or deviate from the standard and/or recommended practices of PMNUO-INSPECTION were adopted for the performance of this inspection at the request of the client, PMNUO-INSPECTION is not liable for the possible compromise of the recorded observations due to such variations of deviations.

3. This report/certificate does not discharge or release sellers/suppliers from their commercial, legal or contractual obligations with regard to quality/quantity of delivery nor does it prejudice the buyer's right of claim toward sellers/suppliers for compensation for any defects (apparent or otherwise) not detected during PMNUO-INSPECTION's random inspection or occurring thereafter.

4. PMNUO-INSPECTION does not accept any liability for the quality of products in this shipment that were not produced at the time of the inspection taking place. Further, this report/certificate does not evidence shipment.

5. PMNUO-INSPECTION's services, including reports and certificates, are subject to PMNUO-INSPECTION's general service terms which have been sent to your company. They can be resent upon written request.

6. During the inspection process, color evaluation is conducted by the inspector in the factory inspection room under normal sunlight or light source conditions specified by the customer. This evaluation is mainly based on the lighting conditions of the factory during inspection, so it is only a preliminary evaluation. To accurately evaluate levels and results, color evaluation needs to be carried out by qualified technicians in a standard laboratory environment.

7. Relevant personnel are required to maintain confidentiality and shall not disclose commercial or technical secrets such as customer information. In case of violation, the company will impose corresponding penalties in accordance with relevant regulations. In serious cases, the company will hold them legally responsible and bear all losses caused.

	INSPECTION REPORT	REPORT NO.:	PMNUO-20250109
		REPORT DATE:	2025/1/9

REMARKS

- The products are packaged in bubble wrap, but not in cartons.
- No approved sample was provided during the inspection.

QUANTITY

Item No./Name	Order Quantity		Inspection Quantity			Unfinished Quantity	Sample Size	
	pcs	ctns	Packed (pcs)	Packed ctns	Not packed (pcs)		Samples from packed products	Samples from unpacked products
Round rattan back chair	550	-	550	0	0	0	80	0
Total	550	-	550	0	0	0	80	
Inspected carton No.		The products are not packed in cartons yet.						

WORKMANSHIP

Inspection Standard:	ANSI/ASQ Z1.4 (formerly known as MIL-STD-105E)		Sampling Plan:	Single / Normal		
Inspection Level:	Level-II		Acceptance Quality Limit (AQL):	Critical	Major	Minor
				0	2.5	4.0
Item Name	Defect Description			Critical	Major	Minor
Round rattan back chair	Dent			0	3	0
	Crack			0	1	0
	Paint bubble			0	0	2
	Dirty mark			0	0	2
	Glue mark			0	0	1
Total Defects Found:			0	4	5	
Defects Accepted:			0	5	7	
Result:			PASS	PASS	PASS
